

IS-BAO Certified Auditing Services Now Available From AMS

The International Business Aviation Council (IBAC) along with leading industry operators developed a code of best practices referred to as the International Standard for Business Aircraft Operations (IS-BAO). It is a globally accepted “gold seal” for business aviation operations that adheres to the highest standards in operational safety and efficiency.

An increasing number of flight departments and charter companies are implementing IS-BAO to demonstrate their compliance to this recognized international standard. Now you can call on **Aviation Management Systems (AMS)** to provide the **Auditing Service** that will confirm your compliance and result in a Certificate of Registration from IBAC and potentially qualify for numerous benefits.

FACTS About IS-BAO :

- This is a voluntary standard with considerable benefits to operators, including satisfying selected ARG/US ratings without additional audits and the potential for preferred insurance rates.
- The core of the IS-BAO is the operator’s Safety Management System (SMS) and implementation of a program.
- The goal of SMS is to manage safety risks effectively by integrating management of operations and technical systems with financial and human resource management.
- Only accredited IBAC 3rd party auditors can provide the audit required for certification and AMS has this accreditation.
- AMS can also help your flight department with implementation and numerous other consulting services - go to www.amsinc.aero for more information.

Call Phil Gibson, an **AMS** IBAC accredited auditor and implementer, today at 603-431-3362 and be on your way to a globally recognized safety and efficiency certification.
